COVER LETTER

Dear Hiring Manager,

I am excited to apply for the Frontend React Developer position. With over 4.2 years of experience in developing and optimizing user-centric web applications using React.js, and also having a solid understanding of the MERN stack, I am eager to contribute to your team.

At Ken42 EdTech, I led front-end development for various modules, significantly enhancing the efficiency and reliability of academic and fee management systems. I developed robust APIs with Express.js, integrated SOQL queries, and improved performance scores dramatically.

My role at Gigaflow Technologies LLP involved developing comprehensive dashboard modules and integrating payment gateways like Razorpay and PayU, which streamlined user payment processes and improved operational efficiency.

I also hold a Master's in Computer Applications and have strong experience with tools and platforms such as GIT, Bitbucket, and JIRA. My proactive problem-solving approach and passion for creating exceptional user experiences align well with your goals.

I am confident that my skills, experience, and passion for creating exceptional web applications make me an ideal fit for your team. I would welcome the opportunity to discuss how my contributions can drive the success of your projects further.

Thank you for considering my application.

Sincerely,

Justin Thomas
React JS Developer
